

AI Opinion ICO

Invest in disruptive technology, the growth in demand for which many times ahead of the offer!

Project summary

AI Opinion is an artificial neural network capable of detecting abnormal cells and tissues on various medical images, with a significant advantage in time and accuracy over healthcare professional. It will gradually process more than 3 million images to reach approximate accuracy of 95% in several diagnostic tests, such as:

- Blood cells;
- Ocular fundus;
- CT/MRI images of different body parts;
- Lungs ultrasound;
- Mammography;
- Urinary bladder ultrasonography;
- Female reproductive system and others.

Main purpose of the project is to introduce the perspective of artificial intelligence into decision-making in diagnostics

AIOP Token

We create an AIOP utility token with a deflation mechanism based on the Ethereum ERC 20 standard.

AIOP tokens can be purchased during token sale. Token can be utilized within the project to purchase medical processing of given images.

AI Opinion token will be listed at token exchanges, with a ticker symbol AIOP.

TOKEN SALE

Pre-Sale	01.06.	30.06.2018
Main Sale	01.07.	31.07.2018
Pre-sale Bonus		+50%
Tokens created	1,000,000,000	
Tokens for sale	500,000,000	

OUR Roadmap – BRINGING THE ACCESS TO HEALTHCARE FOR EVERYONE

Start of Pre-sale: June 1st
Pre-sale period: June 1st June 30th

Sale Participation

You can buy AIOP with BTC (Bitcoin) and ETH (Ethereum) as well as with EUR and USD via credit card or bank transfer.

API for developers

In the framework of AI Opinion project it is expected to develop and publish the API, which will allow any developers to freely use the source code in order to create health applications.

Public API will develop a big pattern of three main directions of healthcare apps:

- Applications for medical institutions
- Applications for patients
- Applications for internet of things
